

APPENDIX A: ISLE OF WIGHT NATIONAL LANDSCAPE

AREA OF OUTSTANDING NATURAL BEAUTY MANAGEMENT PLAN 2025-2030

DELIVERY PLAN

Our Vision: 'The Isle of Wight AONB will remain a beautiful, thriving landscape cared for and appreciated by all'

**Isle of Wight
National
Landscape**
Delivering the AONB Management Plan

This Delivery Plan accompanies the AONB Management Plan 2025 – 2030. It has been devised by the National Landscapes team and wider Partnership and ratified at its Steering Committee. Together these documents provide a mechanism to annually monitor and measure progress of all partners towards delivering the strategic objectives of the AONB.

In assembling the Delivery Plan the Partnership has sought to include a range of actions and projects that contribute to the AONB policies, but can also be easily measured without becoming a bureaucratic burden. The list is therefore not comprehensive and the role played by all its partners is acknowledged, whether or not identified within the Plan.

Whilst the Management Plan covers a five year period the Delivery Plan is focused on priority actions and associated projects likely to be delivered in the immediate 2-3 years. These actions and projects are classed as ‘Doing’, ‘Planned’ and ‘Wish’. Where ‘Planned’ the Lead Partner has indicated the proposed partners, start year, and where possible a means of measuring progress. These may change prior to commencement. ‘Wishes’ have been included where there is a project and lead partner, but no current means of delivery. The usual restriction in this case would be lack of funds. Other actions, where there are currently no defined projects or lead partner, have been excluded from the Delivery Plan, even as wishes, however, they remain recorded in the Management Plan as priority actions.

The Delivery Plan can be accessed through the Wight AONB website www.wightaonb.org.

It will be updated on an annual basis following the Wight AONB AGM. At the AGM attendees will be able to review both progress and priorities for the coming years.

Abbreviation	Organisation	Abbreviation	Organisation
Team	National Landscape team	ACE	Arts Council England

Isle of Wight AONB Contribution to DEFRA Targets and Outcomes for Protected Landscapes in England

The Protected Landscapes have received their high level targets for nature recovery from DEFRA in the Targets and Outcomes Framework (for 2025 – 2030). Our contribution to this initiative can be achieved by adopting the targets in the IWAONB Nature Recovery Plan (quoted below) and our first review is due this year (2024).

Habitat	Maintain (ha)	Fav condition (ha)	Restore / create (ha)
Woodland	871	352	130
Lowland Meadow	119	101	132
Heath and Acid grass	148	126	15
Calcareous grassland	626	532	190
Maritime cliff and slope	51km		5 km
Wetlands	294	294	
Shoreline / coastal	426		15

The areas of the AONB where these might be achieved are illustrated on the following maps and closely align with the Isle of Wight Local Nature Recovery Strategy
